

When do these animals go to sleep?

One morning Possum wakes up and wonders where the stars go in the daytime, so he sets out to find them with the help of some friends. Do you know which animals sleep all day and play at night? Label the animals with **diurnal**, meaning they sleep at night, **nocturnal**, meaning they sleep during the day, or **crepuscular**, meaning they are active primarily during the twilight periods of dawn and dusk. Then have fun colouring them in!

Numbat

Bungarra

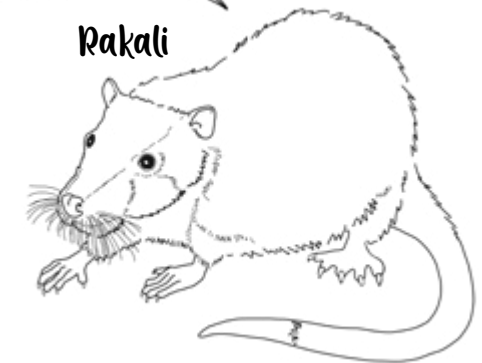

Galah

Kookaburra

Possum

Rakali

Answers: Possum - nocturnal, Kookaburra - diurnal, Numbat - diurnal, Galah - diurnal, Bungarra - diurnal, Rakali - crepuscular, Galah - diurnal.
