

Make Your oWN CoNSTeLLaTioN PRoJecToR

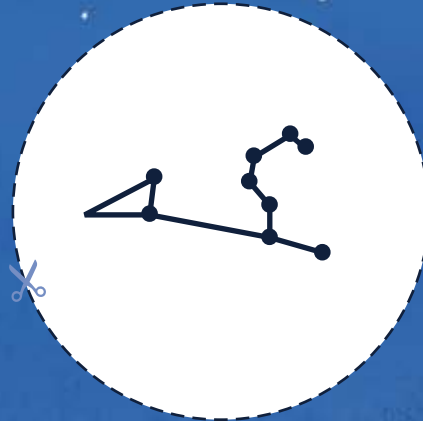

When Pete uses a telescope, the stars which had been pinpricks when he'd looked up a minute ago become big and bright. Like Pete, you can learn about the Australian constellations by making your own projector.

WHaT You Will Need

1. A torch
2. Toilet roll tubes
3. Sticky tape
4. A pin
5. A dark place with a blank wall

MeTHoD

1. Cut out the constellation cards.
2. Using your pin, make a hole in each of the stars.
3. Place your constellation cards face down over the end of your toilet roll tube and secure with sticky tape.
4. Shine your torch through the back of the toilet roll tube to project the constellations onto the wall.
